ULYSSE CASTELLO

Junior Software Engineer | Backend & Data Engineer

Berlin, Germany (EU Citizen) | +358 46 659 7197 | castelloulises1420@gmail.com

Available immediately | Open to immediate relocation

LinkedIn | GitHub | Portfolio

SUMMARY

Junior Software Engineer with a solid foundation in both backend development and data engineering. Experienced with Java and Spring Boot for building scalable applications, as well as Python, Pandas and PySpark for large scale data processing. Background includes freelance client work delivering a production e-commerce platform, along with large scale academic and personal projects covering REST API design, ETL pipelines and cloud deployment on AWS. Based in Berlin, available to start immediately and open to immediate relocation.

PROFESSIONAL EXPERIENCE

Freelance Web Developer, Vivero Belgrano Norte *April 2026*

E-commerce Platform & Content Management System (client project)

Live Site | GitHub Repo

- Engineered a high-performance digital catalog using Astro's Islands Architecture, delivering optimized, zero-bundle-size HTML for core content.
- Architected a decoupled Headless CMS solution using Sanity.io, enabling independent content scaling and professional-grade botanical data management.
- Developed a custom client-side filtering engine with React for real-time, multi-criteria search across the botanical database.
- Implemented a modular UI system based on Atomic Design principles using Tailwind CSS, with edge deployment on Vercel for global performance.

ACADEMIC & PERSONAL PROJECTS

Real Estate Management System, Full-Stack Digital Transformation *2025*

GitHub Repo

- Engineered a robust internal management system using Java (Spring Boot) and SQL Server to automate contract workflows and client records.
- Developed a public property catalog using React and Tailwind CSS, featuring real-time filtering and automated WhatsApp integration.
- Architected and deployed the full solution on AWS infrastructure, ensuring high availability and secure data storage.
- Authored a 190+ page technical thesis covering the full SDLC, including software architecture, source control management, and testing protocols.

Big Data Analytics, Professional Football Data Pipeline *2025*

GitHub Repo

- Designed and implemented an end-to-end ETL pipeline using PySpark and Python to process and model over 1.7M+ professional football records.
- Executed a comparative performance study between Pandas and PySpark, optimizing data processing latency for massive datasets.
- Validated 8 critical business hypotheses through advanced statistical modeling and interactive visualization using Tableau and Hive.
- Developed complex data visualizations, including global nationality heatmaps and market value evolution case studies.

ADDITIONAL PROJECTS

Roulette *2024*

Java desktop application built around core design patterns and an MVC architecture, developed for the Application Design and Development course at Universidad ORT.

GitHub Repo

Hotel Management System *2023*

Full-stack solution with a C#/.NET Core Web API backend and an MVC web client, using SQL Server for data persistence.

Frontend Repo | Backend Repo

EDUCATION

IT Analyst Degree, Universidad ORT, 2025
Analyst Programmer Degree, Universidad ORT, 2025
Web Developer Certificate, Universidad ORT, 2024

TECHNICAL SKILLS

Languages: Java, Python, C#, JavaScript
Backend & Frameworks: Spring Boot, REST APIs, Node.js, .NET
Data Engineering: PySpark, Pandas, ETL Pipelines, Hadoop, Kafka
Frontend: Astro, React, HTML, CSS
Databases: MySQL, SQL Server, MongoDB
Cloud & DevOps: AWS, Docker, Git, Azure

LANGUAGES

Spanish: Native | English: Professional working proficiency | German: Beginner (active learner)
