

Ulysse Castello

SOFTWARE ENGINEER | BACKEND & DATA ENGINEERING

 castelloulises1420@gmail.com  Helsinki, Finland (EU Citizen | Full Relocation Availability)  [Portfolio](#) | [GitHub](#) | [Linkedin](#)

SUMMARY

Backend Developer specialized in building scalable applications using Java and Spring Boot, with strong experience in REST API design and cloud deployment on AWS.

I also have experience in developing data processing pipelines using Python, Pandas, and PySpark, including large-scale ETL workflows handling millions of records.

I focus on writing clean, efficient, and maintainable code, applying best practices such as Clean Architecture and design patterns. I enjoy solving complex problems and working in collaborative environments to deliver high-quality solutions.

Hard Skills

Backend (Primary): Java, Spring Boot, REST APIs, Node.js, .NET

Data Engineering: PySpark, Pandas, ETL Pipelines, Hadoop, Kafka

Frontend: Astro, React, JavaScript, HTML, CSS

Databases: MySQL, SQL Server, MongoDB

Cloud & DevOps: AWS, Docker, Git, Azure

Other Languages: Python, C#

Soft Skills

- Problem Solving
- Teamwork
- Communication
- Adaptability
- Critical Thinking

Languages

- **English:** Professional Working Proficiency
- **Spanish:** Native-speaker
- **Finnish:** Beginner (Active learner)

FEATURED PROJECTS

Real Estate Management System – Full-Stack Digital Transformation

- Engineered a robust internal management system using Java (Spring Boot) and SQL Server to automate contract workflows and client records.
- Developed a high-end public property catalog using React and Tailwind CSS, featuring real-time filtering and automated WhatsApp integration.
- Architected and deployed the entire solution on AWS infrastructure, ensuring high availability and secure data storage.
- Authored a 190+ page technical thesis covering the full SDLC, including Software Architecture, SCM, and Testing protocols.

Big Data Analytics – Professional Football Data Pipeline

- Designed and implemented an end-to-end ETL pipeline using PySpark and Python to process and model over 1.7M+ professional football records.
- Executed a comparative performance study between Pandas and PySpark, optimizing data processing latency for massive datasets.
- Validated 8 critical business hypotheses through advanced statistical modeling and interactive visualization using Tableau and Hive.
- Developed complex data visualizations, including global nationality heatmaps and market value evolution case studies.

E-commerce Platform & Content Management System — Vivero Belgrano Norte

- Engineered a high-performance digital catalog using Astro's Islands Architecture to deliver optimized, zero-bundle-size HTML for core content.
- Architected a decoupled Headless CMS solution using Sanity.io, enabling independent content scaling and professional-grade botanical data management.
- Developed a custom client-side filtering engine with React for real-time, multi-criteria search across the botanical database.
- Implemented a modular UI system based on Atomic Design principles, utilizing Tailwind CSS and edge deployment on Vercel for global performance.

EDUCATION

IT Analyst Degree

Universidad ORT

Analyst Programmer Degree

Universidad ORT

Web Developer Certificate

Universidad ORT
